THE STUNNING BEAUTY OF BRAČ

We present to you something truly special – stone from Brač.

This exceptional natural material is not just a building element, but a source of inspiration, elegance and lasting beauty that will add invaluable value to your home or project.

Brač, an island in the heart of Dalmatia, has been known for its white limestone for millennia. This stone was admired and used by the ancient Romans, and some of the most magnificent buildings in the world, such as Diocletian's Palace in Split, were built with it. Brač stone tells a story of history, tradition and timeless elegance.

A STONE THAT ENCHANTS.

WHY CHOOSE BRAČ STONE?

TIMELESS BEAUTY AND ELEGANCE

Brac stone boasts exceptional whiteness and a fine-grained structure, which gives it a sophisticated and luxurious appearance.

Its light color reflects light and creates a feeling of spaciousness and airiness. Whether you are looking for a classic or modern style, Brac stone blends perfectly with any design.

EXCEPTIONAL DURABILITY & RESISTANCE

This natural stone is extremely durable and resistant to all weather conditions.

Whether you use it for facades, interior cladding, flooring, or exterior design, Brac stone will stand the test of time and retain its original shine for decades.

UNIQUE NATURAL DIVERSITY

Although Brac stone is known for its whiteness, it also offers subtle variations in texture and patterns that are the result of natural processes.

Each piece of stone is unique, adding authenticity and character to your space.

PRESTIGE AND ADDED VALUE

Using Brac stone is not only an aesthetic choice, but also an investment.

This material is synonymous with quality and prestige, which increases the value of your property.

DOLIT

Dolit is a light beige limestone from Donji Dolac near Omiš, with characteristic gray tones, bluish veins and metallic flecks. Its warm appearance and diverse structure make it a great match for a variety of styles.

It is durable and scratch-resistant, making it suitable for wall and floor coverings, monuments, signposts, columns and slabs. Various treatments are possible, with a polished surface best highlighting its color and texture.

DRAČEVICA

This version of Brac limestone comes from the vicinity of the village of Dračevica on the island of Brač. It is a warm beige stone with an inconspicuous structure that captivates with its natural elegance and rustic character. Thanks to its gentle color palette, it easily integrates into both modern and traditional spaces.

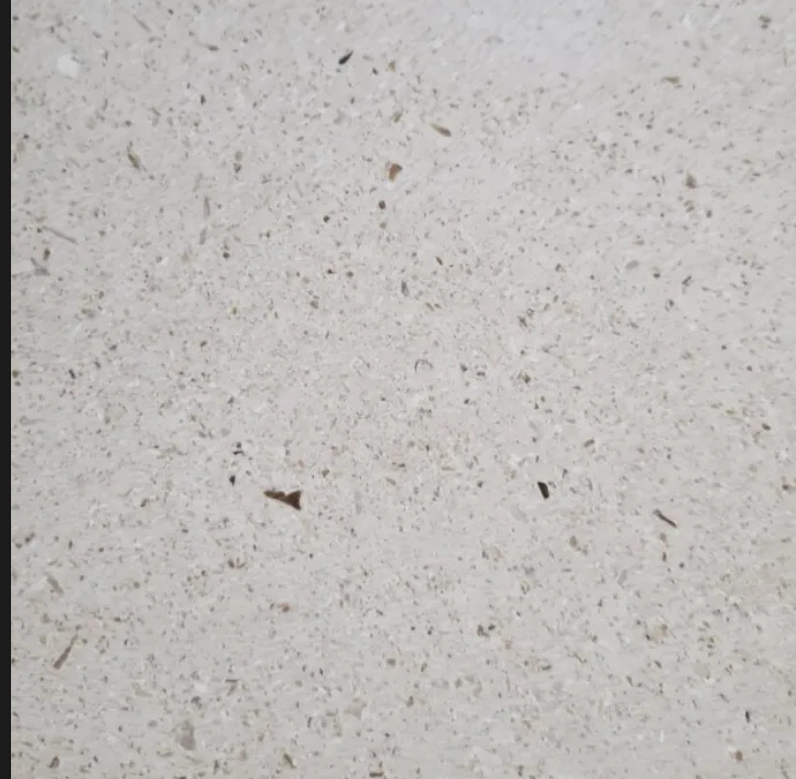

Dračevica is particularly valued in the renovation of historic buildings, as it blends perfectly with the authentic ambience, while being durable and resistant to weather influences - including frost.

VESELJE UNITO

This stone is the embodiment of pure, homogeneous white limestone. Its uniform color and fine structure are ideal for creating minimalist and elegant spaces where the emphasis is on light and simplicity.

Veselje Unito is the perfect choice for modern facades, interior walls and floor surfaces that require impeccable whiteness.

VESELJE FIORITO

If you are looking for a stone with a more dynamic character, Veselje Fiorito is the right choice. This version boasts delicate, subtle patterns reminiscent of floral motifs. These natural patterns add depth and visual interest to the stone, while maintaining its light and elegant base.

Veselje Fiorito is ideal for highlighting individual elements such as fireplaces, countertops or decorative walls.

SIVAC

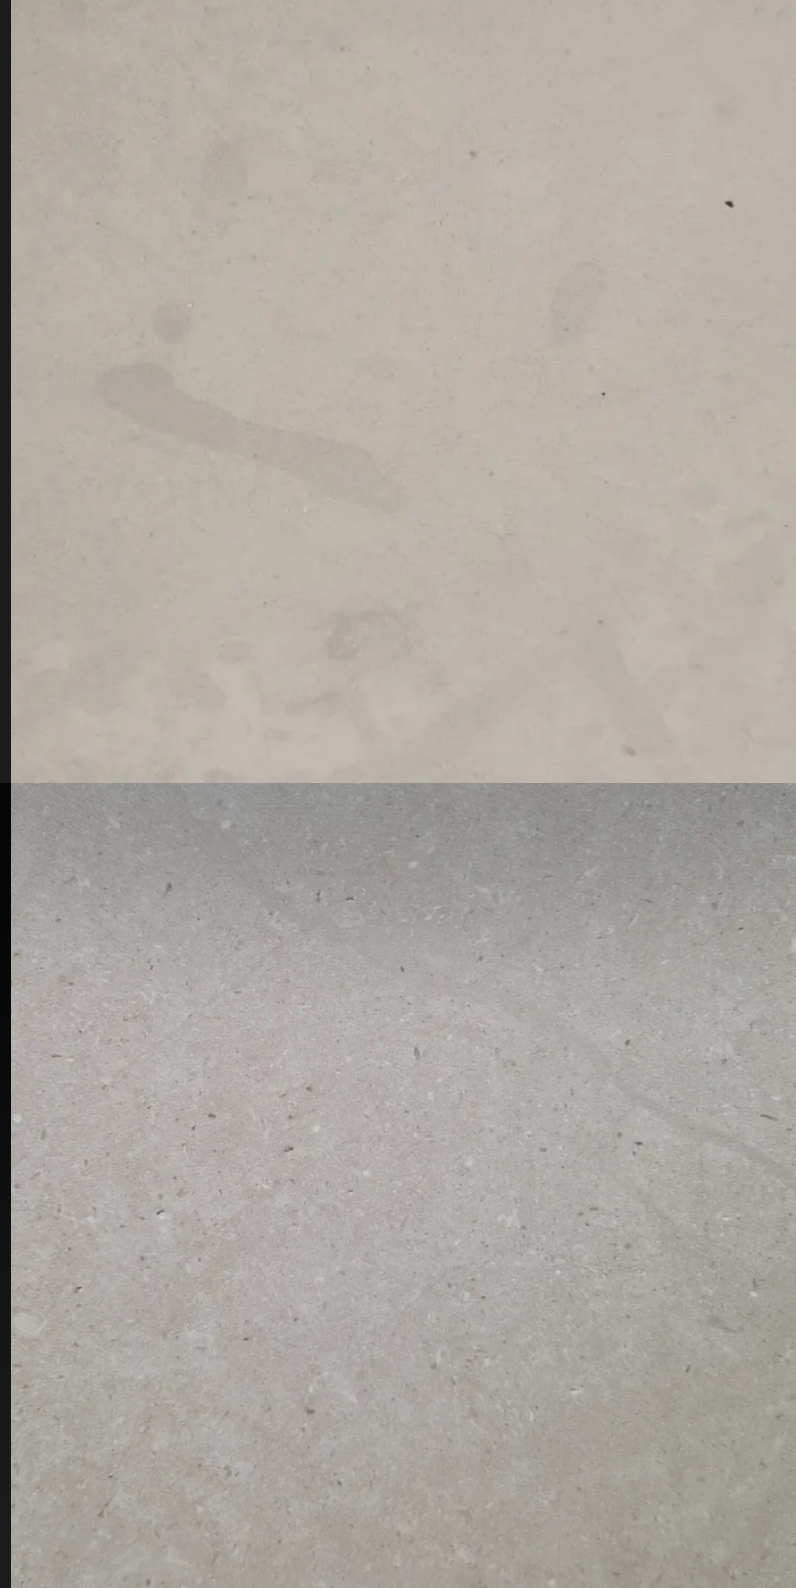

Sivac represents a contrast to the classic whiteness of Brac stone. It is a Brac stone with subtle grayish hues, giving it a more calm and earthy appearance. This version boasts delicate veins.

Despite its grey undertone, Sivec retains the characteristic elegance and durability of Brac stone. It is perfect for spaces where you want to create a more calm, natural or industrial atmosphere, and combines beautifully with wood and metal.

MILOVICA

Milovica is a high-quality dolomitic limestone from the island of Brač, known for its strength and aesthetic appeal. Its light beige color with subtle gray tones fits beautifully in both traditional and modern interiors.

It is used for floors, walls, kitchen and bathroom surfaces, stairs, shelves, mosaics, fountains, monuments and sculptures. A variety of treatments are possible: grinding, polishing, sandblasting, stocking, aging, splitting, etc.

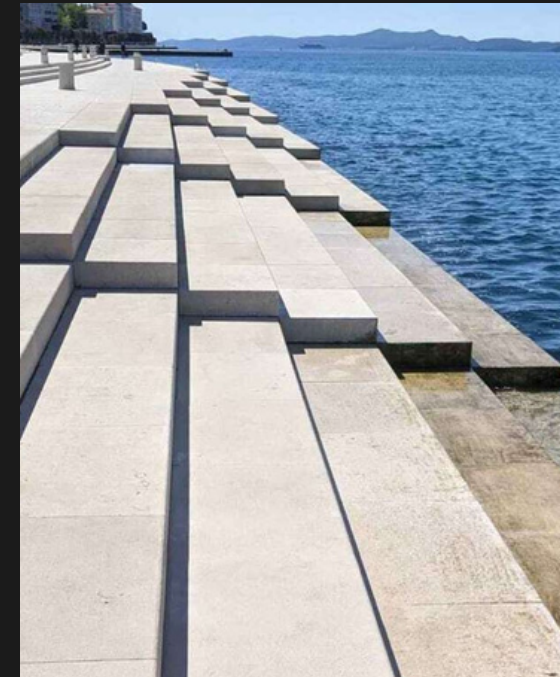

REFERENCES

Stone from Brač is not just a material; it is a work of art of nature, carrying the story and soul of Dalmatia. By choosing Veselje Unita, Veselje Fiorito, Siveca, Milovica, Dračevica and Dolit, you bring a piece of this timeless beauty and durability into your home or project.
